Electronic Timing Survey

Dear Competitor

Many of you may have over the past number of years noticed that we the MSCA have been experiencing difficulties in finding officials to run Super Sprints. And, many of you that were at the last Super Sprint are probably aware of some of the inconsistencies that presented with the results, through no fault of the members that stepped forward to work in the Tower through the day.

This has led the Executive and the Delegates representing you to try and find alternatives to make the task of running Super Sprints easier. One area that can make this easier and work more consistently is the Dorian timing system. Most of the hardware to enable this to happen is already available. The antenna loop is in the circuit and our Natsoft Timing program is compatible and only needs to be connected. What we do not have are the Dorian Transponders.

What we would like to know from our membership is how many Transponders we have to acquire to make this work. To know this we will need to know how many of the membership would be prepared to purchase a Transponder outright, on a purchase plan or already have one of their own.

Purchase price of a transponder would be \$350.00, \$100.00 deposit with your order and remainder on delivery.

The Purchase Plan will be \$100.00 per event plus entry fee payable over 4 events entered.

For anyone that purchases a Transponder through the MSCA and in the unforeseeable future no longer wishes to own their Transponder the MSCA will Buy-back the unit at 80% of the purchase price.

We are planning to have the Dorian system up and running at the Super Sprint prior to the 6Hour Regularity Relay next year.

To assist with this decision can you please complete the slip below and return to the MSCA or electronically via the email with your decision.

Sincerely Yours

Tony Bradley
Secretary, MSCA
